RESIDENTIAL DOOR

Product Details:

These steel doors find usage in vast areas such as domestic applications. Fabricated using high grade steel, these custom steel doors comply with international quality standards and are corrosion resistant.

Features:

- Seamless finish
- Excellent designs
- Corrosion resistance
- Durability

FIRE RESISTANT DOORS

Product Details:

Fire doors are designed to protect and life in an event of a fire. For this, the door must serve as a fire and smoke barrier. Studies have shown that more people have lost lives due to smoke than fire.

Functions:

- Serve as a regular door at all times
- Provide ready egress from fire area during fire
- Inhibit spreading of fire
- Protect life properly by reducing smoke hazards

These doors are available with honeycomb core as standard infill material with other optional cores. These doors are rated for 45, 60, 90, 100 and 120 minutes fire with-standing ability. All fire doors are factory finished with epoxy primer and polyurethane finish paint.

Steel Doors combine Fire Resistance with Door Functionality without compromising any aspect of both the requirements. These types of Doors reduce the Spread of Fire and enable Safe Egress, in-addition to offering highest degree of Compartmentalization. These types of Doors are highly preferred in all types of Buildings, nowadays, to offer Safe and Secure living and Egress. Our Technical Team is always available to offer advice and planning.
